

## Dividing by a 2-digit number (2)

*Trickier multiples with single digit remainders.*

- 1)  $9,729 \div 23 = 423$       23, 46, 69, 92
- 2)  $7,882 \div 14 = 563$       14, 28, 42, 56, 70, 84
- 3)  $621 \div 27 = 23$       27, 54, 81
- 4)  $9,309 \div 29 = 321$       29, 58, 87
- 5)  $5,784 \div 24 = 241$       24, 48, 72, 96
- 6)  $364 \div 28 = 13$       28, 56, 84
- 7)  $3,776 \div 16 = 236$       16, 32, 48, 64, 80, 96
- 8)  $3,808 \div 17 = 224$       17, 34, 51, 68
- 9)  $6,688 \div 19 = 352$       19, 38, 57, 76, 95
- 10)  $4,572 \div 18 = 254$       18, 36, 54, 72, 90
